Clean on the outside, clean on the inside.

How does Aquaclean protect me from viruses and bacteria?

For your peace of mind, Aquaclean fabrics offer a **double guarantee of hygiene from the factory to your home:**

On the one hand, the **Safe Front® component protects against viruses and bacteria** as standard, effectively reducing its activity. On the other hand, the **Aquaclean® component limits the penetration of viruses and bacteria into the fabric.**

The joint formula of Aquaclean and Safe Front®, has been totally effective after multiple washes* and years of use.

**10 washing cycles have been tested at 30ºC, demonstrating its effectiveness.*

CERTIFICATES

→ ISO 20743:2013 8.1
→ ISO 18184:2019

Is Safe Front® effective against COVID-19?

Safe Front® demonstrates its **efficacy in more than 91% against a similar type of coronavirus (Feline Coronavirus).**

What disinfecting agents can I use on my sofa?

→ Alcohol *RECOMMENDED SYSTEM*

1. Spray a 70º alcohol solution on the sofa surface about 30 cm away. Any sanitary alcohol can do.

2. Pass a dry cloth on the sofa spreading and absorbing the excess.

3. Avoid the fabric getting soaked with alcohol.

Avoid rubbing the surface in an aggressive way.

→ Soap

NOT RECOMMENDED

We do not prioritize this method because there are usually dry soap residues that affect the color and appearance of the fabric and possible odor.

→ Bleach

NOT RECOMMENDED

We do not recommend this method because it is difficult to control an excess concentration of bleach, which could cause discoloration of certain tissues, and also because bleach leaves a strong characteristic odor.
